

GROUP Work/Chickens

What are the gender and climate change inclusions are within our institutions/country?

1. Provide the status by inclusion (on track or not on track)

Area of integration	Status (on track/not on track)	Challenges	Actions	Responsible institutions
2. The governments Adopted the gender and climate change policy in all countries.	On track	- All institutions have not implemented the policies	- Ensure governments incorporate	Governments
3. CSO, NGO's and private sector to develop gender and climate change policies within their institutions	In progress	-Lack of Capacity to implement -Not taking value of having developing policies -Lack of financial support	-Provide stakeholder capacity to develop their own policies -Donors/funders to make it mandatory to release funds to institutions that have a gender mainstreaming policy -Ensure financial support for intuitions to develop policies	CSO, NGO's and private sectors Government
4. M&E Frameworks incorporated in Gender and climate change projects	In progress	-Cultural norms, people are resistance to change	-Capacity and empowerment for communities	All stakeholders
5. Local Women and youth in climate action networks	On Track	-Inadequate financial support to implement projects and convene meetings--- International donors work/request to provide funds to only international implementation partners with	- Capacity to develop proposals for funding -Reduce middlemen and work with organizations on ground	Governments ,CSO's and private sector
