

Role of leaders in climate change : what is the extent of
resource commitment to support implementation

Presented by the: COWs
Committee Of Wellness.

Role of leaders of Leaders in climate change : what is the extent of resource commitment to support implementation

Human Resource

- Indigenous knowledge system are not prioritised (need for recognition and strengthen them)
- Engagement platforms for locals
- Skills mismatch (review the programmes and close the gaps, move from theory to practical)
- Brain Drain (Strategize to keep expertise within the countries , Incentivise workers)

Role of leaders in climate change : what is the extent of resource commitment to support implementation

Financial Resource

- External donors (UNDP, IFAD, GIZ, GCF etc... ensure that the need of people are met)
- Limited (due to priorities like clash of interest and survival, corruption)
- Domestic resources focusing on adaptation
- Budget allocations (less meeting more actions on the ground, more in campaigns and interests)

Role of leaders in climate change : what is the extent of resource commitment to support implementation

Natural Resource

- Guarantee maximum protection, preservation and use of natural resources
- Maximise benefit for the local communities
- Domestic Value addition to natural resources
-

Role of leaders in climate change : what is the extent of resource commitment to support implementation

Other Resource

- Poor Infrastructure (climate resilient)

THANK YOU.. MOOOOOOOOOOO!
